**Period for Reply** -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

### **DETAILED ACTION**

This office action is in response to applicants' communication filed on 10/4/10.

Claims 1-20 are pending in this application.

Applicants' election of Group I, wherein A1 to A4 are carbon, and Q1 and Q2 are non heterocyclic, with traverse is acknowledged herewith. Applicants traverse on the grounds that PTO has failed to establish that Groups I-XI lack the same or the corresponding technical feature. The examiner disagrees. See the office action of 9/7/10, wherein an elaborate explanation has been given. Inasmuch as there is no common cre, the restriction requirement is indeed proper and made **FINAL**.

Applicants have further elected a single disclosed species of compound 1208 in Table 3, on page 115 for the examination purposes. Claims 1-4, 6, 15 and 17-18 read on the elected species. Thus claims 5, 7-14, 16 and 19-20 are furthermore withdrawn from the consideration, being drawn to the non elected invention. Claims 1-4, 6, 15 and 17-18 will be examined to the extent they read on the elected species and closely related compounds.

### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Information Disclosure Statement***

The information disclosure statement (IDS) submitted on 8/11/10, 7/14/09, 4/20/09, 2/24/09, 7/17/08, 12/20/07 and 7/28/06 are in compliance with the

Art Unit: 1621

provisions of 37 CFR 1.97. Accordingly, the information disclosure statement have been considered by the examiner.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 1621

Claims 1-4, 6, 15 and 17-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lahm et al(US 6,747,047).

Lahm et al teach structurally similar compounds and composition as claimed in herein See Table I and column 2, wherein R3 can be phenyl. The difference between the reference and herein claimed subject matter is that the reference has not made compounds that are encompassed in herein.

It would have been prima facie obvious to one of ordinary skill in the art at the time the invention was made to obtain compounds within the generic disclosure of the reference, because they are structurally so similar to those claimed in herein, and R3 can be phenyl as well, with the reasonable expectation of achieving a successful insecticidal composition, absent evidence to the contrary.
